PRO COMPLETE 44

PORTABLE FLOORING SYSTEM

Portable sports floor for sporting and non-sporting events. Perfect for international tournaments, which require special line-markings

SYSTEM COMPONENTS

1. Floor panels:
 - 1/1 panel 22 x 517.5 x 1800 mm
 - 1/2 panel 22 x 517.5 x 900 mm
2. Junckers SylvaThene Moisture Barrier
3. Transition ramp

The Pro Complete 44 system consists of 22 mm solid hardwood parquet. The floorboards are preassembled into light weight, hand carried panels.

Underneath each floor panel several prefixed birch battens are mounted together with a soft polyurethane foam to provide correct shock absorption and resilience. Increased panel stability with reinforced aluminum edges. The floor panels are easily locked into position by means of pre-mounted metal brackets.

Lengthwise the panels have a tongue and groove connection and at ends the panels are joined using loose tongues. A supporting and protecting transition ramp forms a strong edge of the floor perimeter.

Pro Complete 44 tolerates larger fluctuations in relative humidity and is therefore suitable for long term use. Use it for up to 12 weeks.

EXCLUSIVE BENEFITS OF A JUNCKERS FLOOR

Complete system control - Junckers subflooring, sports flooring, game line paint, and lacquer top coats are all developed, manufactured, quality controlled, and warranted by Junckers.

Junckers produces only 100% solid hardwood, for a long life span and avoids the risk of veneer layers delaminating.

The floors are extremely stable and therefore cause no challenges when humidity levels change through the year. We take far longer than normal over the drying process to ensure that the movements that occur naturally in all wood is fully controlled and kept to a minimum. Our Beech sports floors are dried using Junckers unique press drying method. Our maple sports floors are kiln dried.

Junckers Floors are pre-finished at our factory, allowing for quicker, and cleaner installations.
